DETAILED ACTION

Response to Amendment

1. This Office Action is responsive to the amendment filed on 5/29/2003. Claims 1, 16, and 18 have been amended and claims 6-15 and 19 have been cancelled. Claims 1-5 and 16-18 are pending. The previous indication of allowability for claim 18 is withdrawn in view of newly discovered art. Claims 1-5, and 16-18 are rejected for reasons given below. This Office Action is made non-final as new grounds of rejection are made that are not necessitated by applicant's amendment.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1745

4. Claims 1-5 and 16-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the IPDL JPO Machine Translation for JP 08-041683 A.

The product-by-process limitations of claims 1-5, and 16-18 are not given patentable weight since the courts have held that patentability is based on a product itself, even if the prior art product is made by a different process (see In re Thorpe, 227 USPQ 964, (CAFC 1985), In re Brown, 173 USPQ 685 (CCPA 1972), and In re Marosi, 218 USPQ 289, 292-293 (CAFC 1983)).

Specifically, the limitations “hydrophilized by one of sulfonation, gaseous fluorine treatment, and vinyl monomer grafting”, and “produced by a wet process” in the claims are not given patentable weight.

The IPDL JPO Machine Translation for JP 08-041683 A discloses a nickel-cadmium battery or a nickel hydride battery (both of which are alkaline rechargeable batteries) comprising a collector including a nonwoven fabric containing crimped fibers laminated to an open-cell synthetic resin sheet and the laminate is plated with a nickel film (see paragraphs 1, 5, and 18 of machine translation). The IPDL JPO Machine Translation for JP 08-041683 A also discloses that the crimped fibers are bicomponent fibers of the sheath-core type fibers and that the crimped fibers can be made from olefins such as polyethylene and polypropylene (see paragraphs 12-19 of machine translation). A nonwoven fabric also inherently contains a plurality of micropores extending from one surface to another surface of the fabric.
